

Template for WG2 - Policies and measures related to CO2 emissions reduction in European countries

1. Brief description of **current situation** of emissions of CO2 (level, sources of emissions, etc.)
2. Recent emission **trends**
3. **General and national laws** regarding environment protection
4. **Specific laws** (if existing) on the reduction of CO2 emissions
5. **Laws** related to other fields which cause emissions (such as transportation, industry, agriculture, etc.)
6. **Ordinances** on Air Pollution Control

For each measure or policy, specify :

- **The objective and/or activity affected** (reduction of overall energy consumption, reduction of CO2 emissions from heating/fossil fuel consumption, promotion of ecological practices, etc.)
- **The type of instruments** (legal, voluntary agreements, economic incentive tax, subsidies, etc.)
- **The status** of the policy or measure (adopted, implemented, in force, under public consultation, suspended, etc.)
